Voice chat lets you talk to your friends through the Blizzard Battle.net desktop app. Setting up a chat session is easy, and you can use it while playing any Blizzard game.

Setup

Setup

Setup is as easy as plugging in a microphone and clicking the [icon] button on the top right corner of a chat session. You can also change settings by clicking the Blizzard icon on the top left of the Blizzard Battle.net desktop app, selecting **Settings** from the dropdown, and clicking the **Voice Chat** option on the left.

- **Input Device** lets you select which connected microphone you want to use. There is a volume slider to adjust the volume of your voice while chatting.
